Seeking a Software Engineering Position

Experience

Flexie Inc. — Full-Stack Software Engineer

May 2024 - present

- Led an international tech team of several developers where I increased sprint velocity by 50%
- Used Typescript to develop fully tested APIs to enhance job seekers' profiles in the Flexie in Flexie's mobile and web apps.
- Used React, NextJS, Tailwind, and Microsoft Azure to implement microservices (such as an authentication app).
- Using Jest, refactored legacy APIs and developed new ones, achieving 100% test coverage and resolving existing bugs.
- Used SQL to create PostgreSQL database queries utilized by services through pgPool.
- Implemented comprehensive logging and monitoring within the codebase using Firebase, significantly reducing errors and improving overall app reliability and a 98% crash-free rate.

Carolina East Medical Center — Computer Tech Assistant

May 2022 - Aug 2023

- Reduced data entry time by 98% through the implementation of a VBA macro/algorithm. Reduced the time taken each month from 3-4 hours to just under a minute
- Assisted in issues around the Carolina East campus such as improving telemetry system accuracy, aided executives with online meeting software (Zoom, Teams, Webex), and surveyed on/off-site server rooms.
- Provided analysis of Emergency Room inefficiencies -- used VBA to provide analytics regarding areas of improvement involving patient health.

Education

UNC, Chapel Hill — 3.3 GPA — BS in Computer Science

Scholarships: Glasgow Scholarship for Engineering

Aug 2022 - Dec 2024

UNC, Charlotte — 3.9 GPA — Computer Science

Scholarships: Glasgow Scholarship for Engineering, Duke Energy Scholarship, Honors Program

Aug 2021 - May 2022

Awards

- HackNC - Capital One Financial Category - 1st place

AI-powered investment portfolio creator. Uses Gemini API and filtering algorithms to suggest a portfolio of stocks and investment amount custom-tailored to your risk averseness, timeframe, and interests.

Projects

- YourStory — Typescript, Supabase, React, AWS — *Personal Project*

Web app designed to allow users to read and upload short stories. Integrates with Supabase no-SQL DB, file storage, and auth.

- OutWork — Flutter, Firebase — *Personal Project*

Create workouts and add them to your schedule. View your upcoming/past workouts.

- Lyft Back-end Engineering Job Simulation — Python — *Personal Project*

Took over development of an unfinished project for the Lyft Rentals team. Drafted a UML class diagram representing a new reorganized architecture. Refactored messy codebase. Implemented unit tests and added new functionality using TDD.

Skills

Languages: Javascript/Typescript, SQL, Python, Swift

Web: HTML, CSS, React

Mobile: Flutter, Xcode

Tools: AWS, Git, Firebase, Supabase
